

IRB Summary

IRB- Investigational Review Board

Summary

The EPFX supplied by Ecllosion with a new device into the USA/Canada is provided with FDA/Health Canada Compliant software- EPFX.

The Clasp 32 Software is available for users worldwide. In most countries this software can be used without any special requirements. All users want to use this version as the facilities are more extensive than the EPFX software.

In the USA/Canada the registration is specifically for use with the EPFX software- legal use of the Clasp 32 software with advanced facilities:

1. Is legally classified as experimental
2. Means that data on the efficacy of the software on client's health must be submitted by a user to an IRB (Investigational Review Board) who must compile this data into a submission.

For Users

3. *This means that in the USA/Canada that the IRB process **MUST** be followed for the device with that Clasp 32 software to be legally used.*

For Trainers/Instructors

4. *It also means that ALL training in these countries **MUST** teach the IRB relevance and process.*

This is not difficult- there are some very simple steps within the program to enable this. Details are below.

Outside the USA/Canada same legalities generally do not apply:

*******HOWEVER- QX & Ecllosion have requested specifically that:**

- **All trainers teach the IRB to ALL students and users- past and present.**
- **All users use the IRB facility to submit information to the IRB**

WHY?

- The way to get Quantum Medicine more accepted is to accumulate validation of efficacy.
- The IRB is specifically set up to enable such validation.
- All you need to do is spend 2 minutes per client
- The IRB facility has software to analyse for this efficacy.
- The whole process is anonymous- there is no client identification.

The details and the IRB process are explained in IRB.pdf. in the Trainer Folder and on the CD.

PLEASE DO NOT:

1. Be concerned if you have not been doing this to date
2. Call your broker- contact Imune via john@imune.net/ T- 011 44 121 243 6318 (UK/canada) +44 121 243 6318 (Elsewhere)

PLEASE DO

1. Start to use the IRB facility- instructions are in the attached document.
2. Email john@imune.net if you have concerns, comments, require clarifications.
