#### **Questions**

##### ***What support materials for learning is there?***

Comprehensive support information (videos and text) will be made available on line. This is being worked on now. By the end of the week a schedule can be emailed to you. Most of you will already know all you need to know. If you fail first time then you will be given the specific questions that you need to revisit: not the answer!

***Why should I do the exam?***

How else do we know what we don't know?

How else do we find out what we should know?

You have been given the gift of access. Why not use it to learn! The exams are structured into modules so you can work at your own pace.

***Why should I pay for this?***

We value what we have to earn and pay for. The fee covers administration and development costs only. This is not a profit making exercise.

***Do I need to do this if I am already IMUNE Certified?/ if I am already an IMUNE trainer?***

The IMUNE executive, after discussion with QX-Ecllosion, has concluded that ALL trainers and users should be brought up to a consistent standard. QX and previous IMUNE operators have instructed that any previously issued IMUNE certificates of any kind (practitioner or trainer) are now considered as expired. This was deemed the best way to ensure we start the quality education process.

***Does this also make me IMUNE Quantum Biofeedback Licensed Practitioner?***

Almost! If you meet the trainer requirements and do the paperwork as per the grandfathering of practitioners that have been through Imune equivalent training. There will be no fee.

This will be released this week to you.

Remember that this qualification is a device teaching qualification- the manufacturer's requirement. All device trainers need to have practitioner qualifications. The Part 2 exams that you do to complete the trainer process are more in depth than the student exams and cover the same topics.

With thanks
